EXPERIENCE

Advayan Technology Pvt Ltd **Bengaluru, IN**

Senior Consultant Nov 2025 – Present

- Architected and developed scalable Micro Frontend (MFE) applications using Angular (latest version) within a monorepo architecture, enabling modular, independent deployments.
- Engineered real-time event-driven data streaming using RxJS and WebSockets, enabling instant dashboard updates upon data changes.
- Designed reusable component libraries and enhanced UI performance, reducing code redundancy by 30% and improving maintainability.
- Integrated advanced PrimeNG data tables, RESTful APIs, and backend services to deliver high-performance enterprise-grade interfaces.
- Improved code quality through Jasmine/Karma unit testing (80%+ coverage) and leveraged AI-assisted development (GitHub Copilot) with structured prompt engineering and validation practices to ensure secure, production-ready code.

Happiest Minds Technologies **Bengaluru, IN**

Senior Software Engineer May 2024 – Oct 2025

- Led development of enterprise-scale Angular 12+ applications using TypeScript, RxJS, and NgRx for scalable state management.
- Designed reusable UI components and shared libraries, accelerating cross-team development and reducing duplication.
- Integrated multiple RESTful APIs and streamlined change detection by leveraging RxJS and OnPush strategy. Reduced initial bundle size and improved load time by 40% using Lazy Loading and AOT compilation.
- Strengthened application reliability by increasing unit test coverage from 40% to 80%, improving defect detection rates and enhancing CI/CD pipeline stability.

Associate Software Engineer Aug 2022 – April 2024

- Revitalized 10+ legacy AngularJS modules, reducing production defects by 25% through structured refactoring and performance tuning.
- Engineered Micro Frontend architecture using Module Federation, enabling independent deployments and reducing release cycles by 30%.
- Developed 20+ responsive and accessible UI components using Tailwind CSS, ensuring WCAG compliance and improving cross-device compatibility.
- Built and validated 15+ complex Reactive and Template-driven forms, reducing form submission errors by 35% through robust validation logic.
- Streamlined Git and GitLab workflows, improving collaboration efficiency and reducing merge conflicts across a 6-member development team.

EDUCATION

Vidyavardhaka College Of Engineering **Bengaluru, IN**

Bachelor of Engineering in Information Science 2018 – 2022

SKILLS

Programming, Development and Framework

- Angular, HTML5, CSS3, JavaScript, Typescript, Angular Material, ReactJs(Basics), Jasmine, Karma , Node.js(Basics), SQL, MongoDB, Git and GitHub.
- Basic understanding of CI/CD pipelines ,Kubernetes ,Docker and automated deployment practices.
- VS Code, Postman, SQL Server.
